ABOUT MYSELF

Software Engineer with 2+ years of experience in Java, Spring Boot, Microservices, REST APIs, and SQL databases. Experienced in building scalable backend applications, secure APIs, and enterprise solutions. Open to relocation and opportunities across Germany.

WORK EXPERIENCE

chain sys software exports pvt ltd - India, Madurai

Software engineer

[12/02/2025 - 29/05/2026]

- Engineered scalable backend services using Java 17 and Spring Boot to process and validate high-volume transactional datasets, enforcing business rules, data normalization, integrity checks, exception handling, and leveraging Java Collections Framework and Generics for efficient data processing across millions of records.
- Built batch and real-time data processing pipelines using Spring Boot with scheduled, asynchronous, and multithreaded execution, utilizing Java Concurrent utilities and caching mechanisms to ensure high throughput, scalability, and system reliability under peak loads.
- Developed secure, standards-compliant RESTful APIs for data ingestion, orchestration, and reporting, implementing validation, pagination, structured responses, JSON serialization/deserialization using Jackson, proper HTTP semantics, and reusable components following OOP, SOLID, and DRY design principles.
- Optimized Oracle PL/SQL procedures and complex queries through indexing, execution plan analysis, unit testing, transaction tuning, and performance optimization, significantly improving bulk data processing efficiency.
- Implemented robust security controls using Spring Security, including JWT-based authentication, role-based authorization (RBAC), HTTPS/TLS Encryption, Java Enums and Annotations, while utilizing Log4j for application logging and monitoring to safeguard sensitive enterprise data.
- Reduced manual cleanup effort by 70% by developing a Generative AI Optimization Parser using OpenAI Integration that converts raw SQL and source code into clean, readable formats, while leveraging SonarQube and GitLab workflows to maintain code quality and development standards.
- Consumed and integrated external REST APIs and microservices using Spring Boot for data ingestion and enterprise system integration, enabling seamless data exchange across distributed systems.

Merkat Intellect technologies Pvt Ltd - India, Tirunelveli

Software developer

[14/09/2022 - 28/07/2023]

- Developed and maintained secure, scalable backend applications using Java, Spring Boot, and microservices architecture.
- Designed and implemented RESTful APIs to support seamless communication across enterprise systems. Improved application performance and reliability by optimizing database queries, caching, and

service-level integrations.

- Established security best practices including authentication (OAuth/JWT), authorization, and data validation to protect enterprise applications.
- Integrated frontend components with backend microservices, enabling smooth data flow and real-time updates.
- Collaborated in the full SDLC (Agile) including requirement analysis, design, coding, testing, and deployment to deliver enterprise-grade solutions.

EDUCATION & TRAINING

Bachelor of Engineering

Anna University [10/07/2018 - 07/07/2022]

City: Tirunelveli | **Country:** India

Website: <https://www.annauniv.edu/> | **Field(s) of study:** Information and Communication Technologies: • Information and Communication Technologies (ICTs) not further defined • Computer use | **Level in EQF:** 6

Trainee

Zoho Corporation [13/12/2023 - 29/06/2024]

City: Tenkasi | **Country:** India

Website: www.zoho.com | **Field(s) of study:** Information and Communication Technologies:

SKILLS

Java (computer programming) | PostgreSQL | JavaScript | Spring (Spring Boot, Spring Security, Spring Integration) | JWT Authentication (medium) | REST APIS' | Microservices Infrastructure | gitlap | Version Control (Git) | Experience in using Postman tools for API testing. | CI/CD (Gitlab CI) | Jenkins - beginner level | Agile development | Oracle SQLDeveloper | SONARQUBE

LANGUAGE SKILLS

Mother tongue(s): Tamil

German

LISTENING: A1 **READING:** A1 **WRITING:** A1

SPOKEN PRODUCTION: A1

SPOKEN INTERACTION: A1

English

LISTENING: B2 **READING:** B2 **WRITING:** B2

SPOKEN PRODUCTION: B2

SPOKEN INTERACTION: B2

PROJECTS

[15/02/2025 - 29/05/2026]

Data Zap Working on a microservices-based ETL platform (DataZap), focusing on the Extract module using Java and Spring Boot.:

- Contributed to a scalable ETL application (DataZap) using Java 17 and Spring Boot for high-volume data ingestion and processing.
- Developed the Extract module and optimized REST APIs to ingest data from multiple external sources.
- Designed data transformation workflows and loaded processed data into PostgreSQL and Oracle databases.
- Built dynamic UI components using Thymeleaf, JavaScript, jQuery, and AJAX for monitoring ETL pipelines.
- Implemented error handling, logging, and complex SQL queries to ensure reliable and high-performance data processing.
- Designed and maintained optimized database schemas for ETL pipelines, ensuring efficient data extraction, transformation, and loading processes.

[15/02/2025 - 29/03/2026]

App Admin Developing a centralized Admin & Access Control system using Java and Spring Boot to manage user roles, project assignments, and application-level privileges across enterprise systems. Implemented role-based access control (RBAC) to manage user privileges across multiple applications. Key features include:

- Assigned users to projects and project groups based on organizational roles.
- Developed features to grant and revoke access to applications and system objects.
- Implemented user provisioning for creating and managing users in the Smart Platform.
- Centralized admin operations to manage access, improving security and control.
- Designed and maintained optimized database schemas for admin management systems, ensuring efficient user, role, and permission handling.

[22/09/2022 - 25/09/2023]

Hiera Developed an Online Exam Application

- Developed an online exam system using Spring Boot with JWT-based authentication.
- Built features for exam creation, question management, and timed assessments.
- Implemented role-based access for admin and student functionalities.
- Developed APIs for exam submission, evaluation, and result processing.
- Ensured secure and reliable data handling with backend validations.
- Designed and maintained optimized database schemas for requirement management systems, ensuring smooth workflow tracking and data consistency.
