 Tirunelveli, Tamil Nadu.
 Open to Relocation
 Actively Seeking Full-Time Opportunities

SUMMARY

Software Engineer with 2+ years of experience building secure, scalable enterprise applications using Java, Spring Boot, and microservices. Skilled in OOP, backend development, and performance optimisation. Has working knowledge of Generative AI (OpenAI) integration.

EXPERIENCE (2+ Years)

Software Engineer

CHAINSYS CORPORATION

 02/2025 – 05/2026  Madurai, Tamil Nadu

- Engineered scalable backend services using Java 17 and Spring Boot to process and validate high-volume transactional datasets, enforcing business rules, data normalization, integrity checks, exception handling, and leveraging Java Collections Framework and Generics for efficient data processing across millions of records.
- Built batch and real-time data processing pipelines using Spring Boot with scheduled, asynchronous, and multithreaded execution, utilizing Java Concurrent utilities and caching mechanisms to ensure high throughput, scalability, and system reliability under peak loads.
- Developed secure, standards-compliant RESTful APIs for data ingestion, orchestration, and reporting, implementing validation, pagination, structured responses, JavaScriptON serialization/deserialization using Jackson, proper HTTP semantics, and reusable components following OOP, SOLID, and DRY design principles.
- Optimized Oracle PL/SQL procedures and complex queries through indexing, execution plan analysis, unit testing, transaction tuning, and performance optimization, significantly improving bulk data processing efficiency.
- Implemented robust security controls using Spring Security, including JWT-based authentication, role-based authorization (RBAC), HTTPS/TLS Encryption, Java Enums and Annotations, while utilizing Log4j for application logging and monitoring to safeguard sensitive enterprise data.
- Reduced manual cleanup effort by 70% by developing a Generative AI Optimization Parser using OpenAI Integration that converts raw SQL and source code into clean, readable formats, while leveraging SonarQube and GitLab workflows to maintain code quality and development standards.
- Consumed and integrated external REST APIs and microservices using Spring Boot for data ingestion and enterprise system integration, enabling seamless data exchange across distributed systems.

Software Engineer

MERKAT INTELEKT TECHNOLOGIES PRIVATE LIMITED

 09/2022 – 08/2023  Tirunelveli, Tamil Nadu

- Developed and maintained secure, scalable backend applications using Java, Spring Boot, and microservices architecture. Designed and implemented RESTful APIs to support seamless communication across enterprise systems.
- Improved application performance and reliability by optimizing database queries, caching, and service-level integrations. Established security best practices including authentication (OAuth/JWT), authorization, and data validation to protect enterprise applications.
- Integrated frontend components with backend microservices, enabling smooth data flow and real-time updates.
- Collaborated in the full SDLC (Agile) including requirement analysis, design, coding, testing, and deployment to deliver enterprise-grade solutions.

PROJECTS

LOG ZERO – AI-POWERED ETL

Personal Project

- Developed LogZero, an AI-powered ETL platform that extracts data from relational databases, processes and transforms it, and integrates it with cloud applications through configurable workflows.
- Integrated SAP S/4HANA Cloud using OData APIs and implemented AI-powered natural-language intent detection using Spring AI and Groq LLM API to simplify data integration and workflow execution.
- Implemented secure authentication, validation, workflow execution, logging, and exception handling using Spring Security, JWT, OAuth 2.0, REST APIs, and PostgreSQL.

Tech Stack: Java 17, Spring Boot, Spring Security, Spring AI, REST APIs, SAP S/4HANA Cloud, OData, Groq LLM API, JWT, OAuth 2.0, PostgreSQL, JPA/Hibernate, Maven, Git

DATAZAP

CHAINSYS CORPORATION

- Developed the Extract module for a microservices-based ETL platform supporting high-volume data ingestion.
- Built REST APIs and data pipelines for PostgreSQL and Oracle integration.
- Improved reliability through SQL optimization, logging, validation, and exception handling.

Tech Stack: Java 17, Spring Boot, Microservices, REST APIs, PostgreSQL, Oracle SQL, Thymeleaf, JavaScript, jQuery, AJAX, Git

APP ADMIN

CHAINSYS CORPORATION

- Developed a centralized access-control system using Java, Spring Boot, REST APIs, and PostgreSQL.
- Implemented RBAC, user provisioning, project assignments, and application-level permissions.
- Built secure workflows to grant and revoke access across enterprise applications.

Tech Stack: Java, Spring Boot, Spring Security, REST APIs, RBAC, Oracle SQL, PostgreSQL, JavaScript, Git

HIERA

MERKAT INTELLEKT TECHNOLOGIES PRIVATE LIMITED

- Developed an online examination platform supporting exam creation, timed assessments, and result processing.
- Implemented JWT authentication and role-based access for Admin and Student users.
- Built REST APIs for question management, exam submission, automated evaluation, and results.

Tech Stack: Java, Spring Boot, Spring Security, JWT, REST APIs, JPA/Hibernate, MySQL, HTML5, CSS3, JavaScript, Git

EDUCATION

BE – 78%
Anna University

📅 2018–2022 📍 Tirunelveli, Tamil Nadu

HSC – 63%
PLWA HR.Sec School

📅 2015–2016 📍 Tirunelveli, Tamil Nadu

SSLC – 73%
PLWA HR.Sec School

📅 2017 – 2018 📍 Tirunelveli, Tamil Nadu

CERTIFICATIONS AND INDUSTRIAL TRAINING

- | | | |
|---|------------------------|---------------------------|
| • Advanced Agentic AI Course, Pro Hrd Institute | 📍 Chennai, Tamil Nadu | 📅 May 2026 - Present |
| • Druid AI-Agent Builder Course, Agentic AI Academy | | 📅 May 2026 |
| • Agentic AI Course, Agent academy.ai | | 📅 May 2026 |
| • SAP ABAP Consultant , Pro Hrd Institute | 📍 Chennai, Tamil Nadu | 📅 Nov 2024 – Jan 2025 Dec |
| • Java Full Stack Development, Zoho Corporation | 📍 Tenkasi , Tamil Nadu | 📅 2023 – Jun 2024 |

HARD SKILLS

- **Frontend** : HTML5, CSS3, JavaScript
- **Backend** : Java (Spring Boot), REST APIs, Microservices, OAuth/JWT
- **Database**: MySQL, Oracle SQL, PostgreSQL
- **Tools** : Git, GitHub, GitLab, CI/CD Pipelines , Postman
- **AI & Advanced Tech**: Generative AI, Groq API, OpenAI API, Google APIs

SOFT SKILLS

- Teamwork, Problem-Solving, Communication, Leadership, Adaptability.

LANGUAGES

- Tamil: (Native)
- English: B2 (Upper Intermediate)
- German: A1 (Basic)
